

INSTALLATION VIA COMPOSER (Recommended)

After the purchase, open Your Account -> Composer Packages.

STEP 1:

Create composer credentials:

Credentials

You need to create username/password or reset it.

Username

Password

CREATE/RESET CREDENTIALS

STEP 2:

We recommend you switch the store into maintenance mode during the installation.

```
php bin/magento maintenance:enable
```

Then add the repository to your composer.json file by the command:

```
composer config repositories.sashas.org composer https://packages.sashas.org
```

STEP 4:

Install the module by the command:

```
composer require thesgroup/module-not-found-url-error-log
```

After installation complete re-compile Magento and disable maintenance mode:

```
php bin/magento setup:upgrade  
php bin/magento setup:di:compile  
php bin/magento indexer:reindex  
php bin/magento cache:flush  
php bin/magento setup:static-content:deploy  
php bin/magento maintenance:disable
```

INSTALLATION VIA ZIP

STEP 1:

Files are packaged in a zip archive, to extract files from the archive. Extract files in any folder.

STEP 2:

Copy files from folder to the Magento root app/code/TheSGroup folder.

STEP 3:

Login to your website ssh console and switch to site owner user (In case you Magento file owner is not the same as the current user)

STEP 4:

Execute following commands:

```
php bin/magento maintenance:enable
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento indexer:reindex
php bin/magento cache:flush
php bin/magento setup:static-content:deploy
php bin/magento maintenance:disable
```

UNINSTALL THE MODULE

STEP 1:

Execute following commands:

```
php bin/magento maintenance:enable
composer remove thesgroup/module-not-found-url-error-log
php bin/magento setup:upgrade
php bin/magento cache:flush
php bin/magento maintenance:disable
```

CONFIGURATION

The Magento 2 module will log any not found page request on your website. You can view logs at the System -> Tools -> 404 Error Log.

404 Error Log

1908 records found

20 per page 1 of 96

The log cleans by a cron task which can be configured at the admin panel Stores -> Configuration -> The S Group -> 404 Error Log

The screenshot shows the admin panel configuration interface. On the left is a vertical sidebar with icons and labels for various sections: DASHBOARD, SALES, CATALOG, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and PARTNERS EXTENSIONS. The main content area is titled 'Logs Cleanup' and includes a 'Scope' dropdown set to 'Default Config' and a 'Save Config' button. Below the title, there is a note: 'All the times are in minutes. Use "0" if you want to skip automatic clearance.' A 'Log Lifetime' input field is set to '10080'. A left-hand menu lists categories: GENERAL, CATALOG, SECURITY, CUSTOMERS, SALES, YOTPO, DOTDIGITAL, THE S GROUP (expanded), Smartsheet Integration, 404 (Not Found) Error Log (selected), and SERVICES.

FAQ

- **Where can I request installation support if I bought it without it?**

You can buy the support package at <https://www.sashas.org/extension-support.html> and then contact us at <https://www.sashas.org/contact> with your order # and FTP, admin access for the website.

- **How can I extract files from the archive?**

You may use WinRAR for this purpose: <http://www.rarlab.com/download.htm>

- **Can I contribute to the module?**

The module is open source and published at the GitHub:

<https://github.com/sashas777/module-not-found-url-error-log>
